
Chapter Six

Technical Bulletins and Installation Requirements

6. Technical Bulletins for Gerard Stone Coated Steel Roofing Products

September 4th, 2007- Algaecide In Basecoat On Roofing Panels

Gerard Roofing Technologies uses Rohm & Haas Algaecide in its basecoat to protect the panels from algae, fungus and mildew. The algaecide has a life expectancy in the basecoat for 5-7 years.

October 15th, 2007- Pressure Treated Battens

Pressure treated lumber should not be used when installing Gerard stone coated steel roofing products, and will void the lifetime limited warranty offered by Gerard on such products. For alternative products or questions contact our technical department.

October 15th, 2007- Fasteners Used In Salt Water Areas

All exposed fasteners used for the installation of Gerard stone coated steel roofing products in the state of Florida, on all Caribbean Islands and within ten miles of salt water must be installed using stainless steel fasteners.
